

Join us for the Final Scientific Conference of our ECO-FISH project

We are pleased to invite you to the **Online Final Scientific Conference** of the ECO-FISH project to present project results including applications for reducing the environmental footprint of the fish production cycle. The Conference will be held on **14 May 2021 at 09:00 (CET)** through **Zoom Platform**.

The event will provide opportunities to:

- Debate approaches, findings and lessons for policy and for practice for assessing environmental footprint in fish production.
- Contribute to an evolving debate of the role of a Life Cycle Assessment for intensive marine fish farms
- Network with key stakeholders, researchers and other interested parties.

Prof. Ioannis Skoufos,
Professor, Department of Agriculture, Division of Animal Production, University of Ioannina, LB

For more information for the Agenda and on how to participate pls visit <https://cb-ecofish.eu/>
